

CHETHAN H S

Aspiring Full-Stack Developer | Cloud Engineer

Davanagere, Karnataka | +91 63638 19322 | chethanhs.tech@gmail.com
linkedin.com/in/chethan-hs-05b19b334 | github.com/chethanhs-tech

CAREER OBJECTIVE

Third-year Computer Science & Engineering student seeking an entry-level Full-Stack Developer or Cloud Engineer role. I aim to apply my skills in React, Node.js, Python, SQL and cloud technologies to build scalable and reliable products, and to grow within a team that values learning and ownership.

EDUCATION

Bapuji Institute of Engineering & Technology (BIET), Davanagere

Expected Graduation: 2028

B.E. in Computer Science & Engineering, Visvesvaraya Technological University (VTU) | CGPA: 9.0 / 10

Smt. Pushpa Shamanur Mahalingappa Pre-University College, Davanagere

PUC / 12th, Karnataka Pre-University Education Board | 95.5%

Amruta Vidyalayam, Davanagere

SSLC / 10th, Karnataka SSLC Board | 84.2%

TECHNICAL SKILLS

- **Programming Languages:** C, Python, JavaScript, SQL
- **Web Development:** HTML, CSS, JavaScript, React, Vite, Node.js, REST APIs
- **Databases & Data Management:** MySQL, PostgreSQL, Supabase, SQL, Database Design, Data Handling
- **AI / GenAI:** Generative AI, Prompt Engineering, Gemini API, AI-Assisted Development
- **Cloud & Deployment:** AWS, Supabase, Vercel
- **Tools:** Git, GitHub, VS Code, Lovable AI, Antigravity
- **Core Subjects:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Computer Organization

PROJECTS

Nulltrace - AI-Powered Cyber Threat Detection Platform

Technologies: Next.js, Tailwind CSS, Supabase, PostgreSQL, Gemini 2.5 Flash, Deepgram, Chrome Extension, n8n

- Built a full-stack threat detection dashboard with 7 scanners: spam, phishing URL, fake job, email, screenshot (OCR), OTP scam and voice.
- Engineered a Gemini-powered engine returning a risk level, threat patterns and a 0-100 Trust Score; built Voice Sentinel with Deepgram speech-to-text for audio up to 25 MB.
- Created a Manifest V3 Chrome extension for right-click scanning on WhatsApp Web, Gmail and other sites.
- Automated 5 n8n workflows (WhatsApp alerts, daily digest, voice pipeline) and an AI cybercrime-complaint generator; stored scan history in Supabase.

TracxnLabs - AI-Powered Secure Online Examination Platform

Technologies: React, TypeScript, Vite, Tailwind CSS, shadcn/ui, Supabase, PostgreSQL, Edge Functions, Vercel

- Developed a full-stack exam platform with student portal, coding exam interface, automated code evaluation, leaderboard and admin dashboard.
- Implemented AI proctoring: webcam face and multiple-face detection, tab-switch and fullscreen-exit detection, and evidence screenshots.
- Designed a credibility scoring engine with weighted penalties for 4 violation types; built serverless Supabase Edge Functions for code evaluation.
- Deployed on Vercel. Live project: <https://transcxlabs.vercel.app/>

GrozoSphere - Smart Grocery Inventory & Transaction Management

Technologies: React, Vite, JavaScript, Supabase, PostgreSQL, CSS, Vercel

- Developed a full-stack inventory and transaction management app with role-based access control for 3 roles: Admin, Staff and Customer.
- Built modules for inventory, product categories and variants, transactions, alerts and activity logging on a Supabase/PostgreSQL relational database.
- Deployed on Vercel. Live project: <https://dbms-project-neon.vercel.app>

Guardian - AI Proctoring Chrome Extension

Technologies: Chrome Extension, JavaScript/TypeScript, Supabase, Gemini AI

- Developed an AI-assisted proctoring layer for LMS platforms; captured examination events, telemetry and snapshots and stored them in Supabase.
- Worked on an admin monitoring dashboard and designed a Gemini AI auditor workflow to analyze events and generate recommendations.

NEREID-X - Sonar Analysis & Annotation Project

Technologies: Python, FastAPI, AI/ML

- Worked on a sonar-image analysis and annotation solution for a Smart India Hackathon-oriented problem using a FastAPI annotation server in Python.

ACHIEVEMENTS & EXTRA-CURRICULAR

- Worked on a Smart India Hackathon-oriented technical project (NEREID-X); participated in hackathons and technical project work.
- Developed and deployed full-stack projects, including live applications on Vercel, with hands-on GenAI, cloud and database experience.
